**Taking a global view of education**

The College Board of Governors has been carefully reviewing a number of opportunities that build on the school's longstanding international reputation and increase our global view of education.

The Board believes there may be considerable educational and financial benefits from extending our footprint outside the UK by developing a "sibling" to Epsom College.

With this in mind, the Board has approved a detailed analysis of the potential of a school in Malaysia. The key partners already have an educational focus and record in Malaysia and are bearing in full the "seed" funding for this analysis.
